

SPONSORSHIP OPPORTUNITIES

IS YOUR TEAM UP FOR THE CHALLENGE?

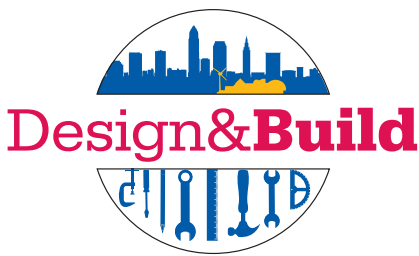

Join us on Saturday, February 9, for the eighth annual Design and Build competition at Great Lakes Science Center.

Design & Build provides a way for corporations, schools and families to build team spirit in a fun, creative environment while supporting the Science Center's mission!

Teams of two to eight individuals will be given a design challenge and all the materials needed on the day of the competition. They race against the clock, and the other teams, to see who can design, build and then test the most successful solution to the challenge. Teams compete in one of two categories: Youth (middle through high school students), or Adult (corporate teams or college students).

Design & Build gives the community the opportunity to engineer victory and construct a brighter future fueled by STEM learning and Great Lakes Science Center. Your organization and employees can make a direct impact on the next generation of engineers, researchers and astronauts!
