Who: Great Lakes Science Center/NASA's Glenn Research Center

When: Artemis I Orion spacecraft presentation by NASA's Orion Program Manager
5-7 p.m. Tuesday, November 26

What:

NASA's Orion spacecraft will soon transport the first woman and next man to the moon as part of the Artemis I mission. But before that can happen, the capsule will undergo environmental testing at NASA Glenn's Plum Brook Station in Sandusky, Ohio. The thermal tests being conducted at Plum Brook will subject the spacecraft to the rigors of space travel.

The Science Center invites the public to join NASA Glenn employees for a free special presentation on Orion and Artemis I by NASA Orion Program Manager Mr. Mark Kirasich from 5-7 p.m. on Tuesday, November 26 in the Science Center's Reinberger Auditorium. After the presentation there will be time for audience Q&A, live science demonstrations, and free general admission to the Science Center.

About Great Lakes Science Center

Great Lakes Science Center, home of the NASA Glenn Visitor Center, makes science, technology, engineering and math (STEM) come alive for more than 300,000 visitors a year through hundreds of hands-on exhibits, temporary exhibitions, the Cleveland Clinic DOME Theater, Steamship *William G. Mather*, daily science demonstrations, seasonal camps, and more. The Science Center, a 501(c)(3) non-profit institution, is funded in part by the citizens of Cuyahoga County through Cuyahoga Arts and Culture. Visit **GreatScience.com** for more information.
