Are you up to the **challenge?**

Great Lakes Science Center's annual Design & Build engineering competition allows Northeast Ohio students and corporate teams to compete in a fun, creative environment—all while supporting the Science Center's mission!

During the competition, teams are presented with a design challenge and all materials needed to complete it. Teams race against the clock—and against their competitors—to design, build, and test a successful solution.

Design & Build provides sponsors with an opportunity to engineer victory, engage the community, and generate excitement about STEM careers. Through a sponsorship, your organization can inspire the next generation of innovators!

Sponsorship Opportunities:

	Challenger <i>\$10,000</i>	Innovator <i>\$5,000</i>	Designer <i>\$2,500</i>
